COURSE BACKGROUND AND COURSE OVERVIEW:

The 21st Century Skills is a new, and that shows an importance in the modern days. So, people need to seek for the knowledge instead of having and storing it. Seeking out is more useful than the knowledge itself. Then, they need to learn how to use the knowledge in its own place, rather than only having it. These make people self-reliant and competent in any case. In addition, they will have the skills of solving problems on their own.

People have to courage of critical thinking, creative thinking, communication skills, seeking and inquiry based, and the system have to approve the individual thinking, besides. Students do not need to encyclopaedical knowledge, they need to practical knowledge by seeking, researching, Also, using ICT, entrepreneurship, language skills, are also important in the students' age of being individuals. So, teachers have to teach how they can acquire and provide the knowledge that are the techniques and methods for based on cooperation and collaboration, and the most important main skills in the 21st Century to their students in the lessons.

The school managers and teachers have to provide these 21st Century Skills to their students in order to be adequate and experienced persons in their professional lives. So, taking this education will be useful for their vocational progress. So, the course will be included with the 21st Century Skills, and they have to improve them.

COURSE OBJECTIVES:

- Realize the life-long learning
- Improve the quality of the education system
